

# His Time Sheet and His Hamilton Are Indispensable

R. F. DEMARCE, of the Rock Island Lines, must have a watch that is accurate, sturdy and dependable. His job, Supervisor of Motor Cars on the Illinois Division, demands accurate timekeeping. A Motor Car Supervisor must be on constant lookout for trains when he is out on the division and, as he must get his "line up" on trains between stations, accurate time is a stern necessity.

That is why Supervisor DeMarce, twelve years ago, selected a Hamilton as his watch. He knew that a watch enjoying so wide a popularity as the Hamilton among railroad men must have a record of performance back of it. His experience over the past twelve years has proved the wisdom of his judgment.

Every railroad man in transportation service needs an accurate watch. Accuracy is the first consideration; dependability and sturdiness, however, are almost equally important. That is why the Hamilton—a watch that combines these qualities in high degree—is the favorite watch of most railroad men.

Ask your jeweler to show you the new Hamilton railroad model, which combines a specially designed case with the famous Hamilton 992 movement. It can be had, fitted with the dial of your choice, and will be ready to serve you with dependably accurate time today, tomorrow and a dozen or a score of years hence.

We will be glad to send you a copy of the new Hamilton Time Book which we have prepared especially for railroad men. Address your request to the Advertising Department.

HAMILTON WATCH COMPANY  
LANCASTER, PENNA., U. S. A.
